

My Invention

By Julia Bielenin

If I could invent anything in the world it would be The Food Immortal. This is how it works. So, there is a big metal can and you have to put any kind of food you want to be immortal inside it. Then you close the lid and you pull the red lever on the side.

Then after a few minutes there will be a beeping sound. When it stops you open the lid and take out the food. It will come out normal but when you eat it the food will reappear so you can eat it again!

You are not allowed to pour in any drinks because then The Food Immortal will flood and break. The food becomes immortal because when the food is inside the Food Immortal then there is lots of smoke that has some magic thing inside it that makes the food immortal. Maximum food allowed in the Food Immortal is 10.

So, yea that is my invention. Thanks for reading this. Bye!
