

My Invention

By Ruby Gethings

My invention is a dog car because humans have their own car and why cant dogs have a car. Well ye I know they do not know how to drive a car but the car will drive itself.

It can see things it knows when someone is coming and it is very safe. It has very fluffy seats it has a food and water bowls

and it comes in all sorts of different colours and it even has a dog radio that speaks dog!

THE END!!
